# Preparing for Emergencies

# A Checklist for People with Mobility Problems

emergencies such as fires and floods present a special challenge. Protecting yourself and your family when disaster

This checklist will help you get started. Discuss these

ideas with your family, friends, or a personal care attendant, strikes requires planning ahead. and prepare an emergency plan. Post the plan where everyone will see it.

#### **Emergency Checklist**

Ask Questions  Call your local emergency management office or Red Cross chapter.  Ask what kind of disasters could occur in your area and how to prepare for each.  Ask how you would be warned of an emergency.  Ask about special assistance that may be available to you in an emergency. Many communities ask people with a disability to register, usually with the local fire department or emergency management office, so needed help can be provided quickly in an emergency.  Ask your supervisor about emergency	<ul> <li>□ Post emergency telephone numbers near telephones and teach your children how and when to call for help.</li> <li>□ Leam what to do in case of power outages and personal injuries. Know how to connect or start a back-up power supply for essential medical equipment.</li> <li>□ If you or someone in your household uses a wheelchair, make more than one exit from your home wheelchair-accessible in case the primary exit is blocked in a disaster.</li> <li>□ Teach those who may need to assist you in an emergency how to operate necessary equipment.</li> <li>□ Arrange for a relative or neighbor to check on you in an emergency.</li> </ul>	Prepare a Disaster Supplies Kit Assemble supplies you might need in an evacuation. Store them in an easy-to-carry container such as a backpack or duffle bag.  Include: A battery-powered radio, flashlight, and plenty of extra batteries for them. A first aid kit, prescription medicines, and an extra pair of glasses. A supply of water (one gallon per person per day). Store water in sealed, unbreakable containers. Identify the storage date and replace every six
plans at your workplace.  ☐ Ask your childrens' teachers and caregivers about emergency plans for schools and day-care centers.  ☐ If you currently use a personal care attendant obtained from an agency, check to see if the agency has special provisions for emergencies (e.g., providing services at another location should an evacuation be ordered).	<ul> <li>□ Learn how to turn off the water, gas, and electricity at main valves or switches.</li> <li>□ Plan and practice how to escape from your home in an emergency.</li> <li>□ Consider getting a medical alert system that will allow you to call for help if you are immobilized in an emergency.</li> <li>□ If you live in an apartment, ask the management to identify and mark accessible exits.</li> </ul>	months.  A supply of non-perishable food and a non-electric can opener, plus any special foods you require.  If you have a baby, include extra diapers and other infant care items.  Extra wheelchair batteries, oxygen, medication, catheters, food for guide or service dogs, or other special equipment you might need.
Create a Plan  Meet with household members or your personal care attendant. Discuss the dangers of fire, severe weather, earthquakes and other emergencies that might occur in your community.  Determine what you will need to do for each type of emergency. For example, most people head for a basement when there is a tornado warning, but most basements are not wheelchair-accessible. Determine in advance what your alternative shelter will be and how you will get there.	<ul> <li>□ Learn your community's evacuation routes.</li> <li>□ Listen to a battery-operated radio for emergency information.</li> <li>□ Pick one out-of-state and one local friend or relative for family members to call if separated by disaster.</li> <li>□ Pick two meeting places:         <ul> <li>1) A place near your home in case of fire.</li> <li>2) A place outside your neighborhood in case you cannot return home after a disaster.</li> </ul> </li> <li>□ Keep family records in a watertight, fire-proof container.</li> </ul>	<ul> <li>A change of clothing, rain gear, and sturdy shoes.</li> <li>Blankets or sleeping bags.</li> <li>A list of family physicians and the relative or friend who should be notified if you are injured.</li> <li>A list of the style and serial numbers of medical devices such as pacemakers.</li> <li>An extra set of car keys.</li> <li>Also</li> <li>Store back-up equipment, such as a manual wheelchair, at your neighbor's home, school, or your workplace.</li> </ul>

### Escape Plan

n a fire or other emergency, you may need to evacuate on a moment's notice. Be ready to get out fast.

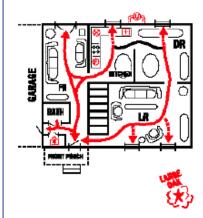

Develop an escape plan by drawing a floor plan of your residence. Show the location of doors, windows, stairways, large furniture, and emergency supplies (Disaster Supplies Kit), fire extinguishers, smoke detectors, collapsible ladders, first aid kits and utility shut-off points.

Indicate at least two escape routs from each room, and mark a place outside of the home where household members and/or your personal care attendant should meet in case of fire. If you or someone in your household uses a wheelchair, make more than one exit from your home wheelchair-accessable in case the primary exit is blocked in a disaster.

Include important points outside such as garages, patios, stairways, elevators, driveways, and porches. If your home has more than two floors, use an additional sheet of paper. Practice emergency evacuation drills at least twice each year.
